

Manufacturing of the technology line equipment for thermo-chemical processing

Inter- Castor is reliable partner, thanks to many years of experience gained in cooperation with leading producers of furnaces for metal and glass heat treatment.

Elements of devices and furnaces for heat treatment

Based on the provided documentation, we produce spare parts and consumables of heat treatment devices;

- housings
- heating chambers
- retorts
- turbines
- racks/ baskets
- burners
- and plenty more

Auxiliary equipment (loading and unloading, washing, drying, etc.)

Modernization and repair of heat treatment devices

- installation of spare parts
- modernization of thermal isolations
- modernization of heating systems
